Reasons for Allowance

1. Claims 1 and 3-7 are allowed.
2. The following is an examiner's statement of reasons for allowance:

While Lea (U.S. Patent No. 6,032,202) discloses a home audiovisual network system that provides an open architecture for interoperability between devices within a home network from any manufacturer to function seamlessly with the home audiovisual system. The system polls system data of other devices when a new device is added to the system and stores the system data to volatile and non-volatile memory. However, Lea does not teach when operated appropriately by a user, the control unit in the one control device stores system data for the connected other controlled devices on one of the smart card and the chip card using the device; and other limitations related to these features in combination with the remaining elements and features of the claimed invention.

And Craig (U.S. Patent No. 6,266,809) discloses a system for updating firmware in a network computer by replacing, at the server, the standard operating system to be loaded at the initialization of a network computer with a firmware update operating system. The network computer includes a smart card having a memory for storing secure information. However, Craig does not teach when operated appropriately by a user, the control unit in the one control device stores system data for the connected other controlled devices on one of the smart card and the chip card using the device; and other limitations related to these features in combination with the remaining elements and features of the claimed invention.

Neither of these references taken either alone or in combination discloses a system having a plurality of devices connected to one another via a home bus interface having all the

claimed features of applicant's instant invention, specifically including: the mobile, digital data medium is one of a smart card and a chip card having a memory and in that when operated appropriately by a user, the control unit in the one control device stores system data for the connected other controlled devices on one of the smart card and the chin card using the device; and other limitations related to these features in combination with the remaining elements and features of the claimed invention. Also, there is no motivation to combine the Lea reference with the Craig reference to meet these limitations. It is for these reasons that applicant's invention defines over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
